**AW 22** 

### **OUTDOOR APPAREL**

WATERPROOF Water resistance is a feature that specifies the resistance of a given laminate to water. Water resistance parameters are given in millimetres water column, which specifies the maximum amount of water against which the laminate is able to protect us. The higher the water resistance value, the more resistant is the material to leaking.

**BREATHABILITY** Breathability is given in grams of water vapour which the laminate is able to discharge to the 1 m2 surface within 24h. The higher this value, the better the breathability of the laminate.

**2-LAYER LAMINATION** The membrane is laminated with outer layer, and from the inner side it is connected to separate lining.

2,5-LAYER LAMINATION

The membrane is connected with outer layer and from the inner side there is aditional print applied to the lamination.

**3-LAYER LAMINATION** The membrane, inner and outer side are laminated together.

**DWR COATING** DWR (DURABLE WATER REPELLENT) - top treatment applied to fabrics to ensure high water resistance. Thanks to the additional hydrophobic coating water droplets are suspended and roll off the outer layer of the fabric.

2 IN 1 PANTS Possibility to attach the legs ensures adaptability to weather conditions.

**FEATHERS/DOWN** Feather, down or mix filling provides lightness and excellent thermal insulation properties of clothing.

**TAPED SEAMS** Taped seams provide higher water resistance parameters.

**WATERPROOF ZIPPER** Zippers covered with additional laminate provide better protection of the clothing against soaking.

YKK ZIPPER High quality zippers providing class leading strength and reliability.

**TWO-WAY ZIPPER** The zipper allows zip up clothes in two directions.

**4 WAY STRETCH** Stretchy material which significantly increases your comfort and does not constrain your movements due to its 4-direction elasticity.

RIP STOP Fabric reinforced with additional strong fibre ensures the resistance of the fabric to chafing and tear.

**VENTILATION** Ventilation openings in the clothing are responsible for proper air circulation and evaporation of moisture on the outside.

**LEGS ZIPPED** Zippers in trouser legs make it easier to put on and take off your shoes.

**POWDER SKIRT** Powder skirt prevents snow from getting under the outer layer of the clothing and retains the heat inside the jacket.

LEGS POWDER SKIRT Internal powder skirts in the legs protect against the ingress of snow under the pants and into the shoes, thus protecting against heat loss.

**REMOVABLE HOOD** Possibility to remove the hood.

**REMOVABLE BRACES** Possibility to remove the braces.

**SKIPASS POCKET** Comfortable pocket located in the sleeve of the jacket allows for quick and efficient use of the skipass.

**DRY POCKET** The practical pocket inside the jacket protects the items by getting wet.

THUMB HOLES Internal, elastic cuffs with thumb holes protect hands against cold and keep heat inside the jacket.

REFLECTIVE ELEMENTS
Reflective elements increase safety
during active leisure.

**QUICKDRY** Synthetic materials are characterised by a short drying time, which ensures comfort during and after exercise.

**MICROFLEECE LINED** Microfleece lining increases the thermal comfort of the clothing.

**ORGANIC COTTON** Cotton that is grown organically without the use of any synthetic fertilizers or other hazardous agricultural chemicals.

**THERMOACTIVE** 

**AIRWAY** Used synthetic materials ensure free air flow, which provides the user with a feeling of comfort while practicing various physical activities.

**QUICKDRY** Synthetic materials are characterised by a short drying time, which ensures comfort during and after exercise.

**SEAMLESS** Seamless clothing provides a very good moisture transport, while ensuring dryness and maintaining thermal comfort regardless of the level of activity.

### APPAREL Accessories

**AIRWAY** Used synthetic materials ensure free air flow, which provides the user with a feeling of comfort while practicing various physical activities.

**QUICKDRY** Synthetic materials are characterised by a short drying time, which ensures comfort during and after exercise.

**WATERPROOF** The plastic layer (PE or TPU) between the shell and insulation ensures waterproofness.

**WINDPROOF** The material that ensures windproofness.

**WOOL** Natural fiber is characterized by excellent thermal insulation properties.

MICROFLEECE LINED
Microfleece lining increases the thermal comfort of the clothing.

WRIST ELASTIC STRAPS Comfortable, flexible wristbands are a practical solution when practicing winter sports.

**REFLECTIVE ELEMENTS**Reflective elements increase safety during active leisure.

**SEAMLESS** No seams or their minimization in the clothing provides comfort and convenience of use and eliminates the possibility of abrasions during physical activity.

**3-PACK** Set of three pieces

KNITTING Shoes made of knitted textile perfectly fitting to your feet. They are lightweight and breathable.

#### REFLECTIVE ELEMENTS

Reflective elements increase safety during active leisure.

#### **WASHING MACHINE**

Cleaning and impregnating agents intended for washing in a washing machine.

**OUTDOOR ACCESORIES** 

MERINO WOOL Merino wool provides thermal comfort during exercise. It is lightweight, guick-dry, and keeps fresh longer. Provides comfort owing to the delicate and fine thread structure.

**TEXTILE** This fabric is based on a network of natural and artificial fibers - footwear utilising it proves to be lighter and more breathible.

MESH Synthetic mesh provides ex-

cellent breathability of the footwear. Owing to this, the footwear is lighter

and quickly discharges moisture to

the outside of the upper.

**ACCESSORIES** 

**SHOES** 

#### MEMORY FOAM INSOLE

IMPREGNATION /

CLEANING /

CARE AGENT

Memory foam applied in the insole of the sports shoes adapts to the foot shape, ensuring comfort and support.

### **TRAVEL**

TSA LOCK Thanks to TSA (Travel Sentry Approved) system, the customs agents will use a master key or code to search your luggage without damaging the lock.

WARM BOOTS Shoes insulated

WATERPROOF MEMBRANE

Waterproof, windproof, and breathable membrane sock inside the

free circulation of water vapour,

shoe provides optimum performance

and comfort. The membrane allows

reducing its condensation inside the

shoe and ensures protection of the

shoe against rain and snow, thereby

maintaining the thermal comfort of

**LEATHER** Shoes made of leather

are breathable and soft, and adapt to

the shape of the foot. Owing to these

properties, they are more comforta-

ACTION LEATHER Type of leather,

characterized by high air permeabi-

lity and high resistance to scratches

thanks to which shoes adapt to your

and scrapes. Action leather is

not stretch excessively.

covered with polyurethane finish,

feet, protect against water and do

feet during exercise.

ble and breathable.

**RB RUBBER** Sole made of RB rubber is slip resistant, flexible, and waterproof. It perfectly insulates the foot from the ground, which significantly increases thermal comfort on cold days.

**CLEANING AGENT** Active substances contained in the line of cleaning agents intensively clean and protect dirty surfaces. They renew the original properties of cleaned surfaces and prepare them for impregnation.

CARE AGENT The line of care agent nourishes, restores color and refreshes the structure of the material.

#### **IMPREGNATION AGENT**

The impregnation agent form a layer resistant to water and dirt, without blocking the air permeability of materials.

**DEODORANT** Refreshes and prevents the formation of unpleasant odors inside the footwear.

**CLOTHING EQUIPMENT / AC-CESSORIES SHOES** Assortment group dedicated to cleaning, conditioning and impregnating agents.

### SKI ACCESORIES

### **GOGGLES**

**UV400** UV400 filter ensures 100% protection against UVA and UVB solar radiation.

**UV FILTER** The filter category determines the degree of light permeability. The higher the category, the lower the light permeability. Category 3 means 8-18% light permeability. Cat. 2: 18-43%, cat.1: 43-80%, cat. 0: 80-100%.

**POLY CARBONATE** The polycarbonate from which the lenses are made is a durable, unbreakable material, resistant to scratches and UV radiation.

**REVO** The REVO coating perfectly reflects ultraviolet radiation, eliminates reflections, improves contrast and gives the lenses a characteristic rainbow color.

from the inside.

TPR RUBBER Thermoplastic rubber is characterised by high strength and resistance to low temperatures. The sole made of this material is durable and wear resistant.

**EVA PHYLON** Thanks to innovative manufacturing technology, EVA Phylon foam is extremely light, flexible and has excellent cushioning properties.

**EVA FOAM** EVA foam adapts perfectly to the foot. It is lightweight and flexible, thereby providing excellent cushioning while maintaining a small weight.

**HI-POLY** Breathable, lightweight and antibacterial foam. Perfect shock-resistance and comfort.

**REMOVABLE INSOLE** The possibility of removing the insole.

SPARE SHOELACES Additional pair of shoelaces.

**SYNTHETIC MATERIAL Shoes** made of a synthetic material (PVC, PU, TPU, rubber) are easy to maintain, offer a large range of colours and designs.
